

One center. A quieter caption.

Same 121 x 70 mm format. Print at 100% / Actual size, without Fit to page.

V2 / caption extends beyond the image edge

V3 / image, title and question share one center

The world ID and target stay at the image edges. The central caption is balanced independently.

50 mm - check after printing

A little more world in your hand.

Corrected caption at two actual sizes. The complete artwork remains visible.

12.1 x 7.0 cm / current format

14.6 x 8.9 cm / larger candidate

The larger candidate has 53% more card area and artwork at approximately 327 dpi.

Screen scaling is not a size guide. Print at 100% and cut out both rectangles to compare.

50 mm - check after printing

The generous comparison.

17.8 x 12.7 cm / Giant size / Actual size. More room to inspect; a substantially larger deck.

The Questionable Move
What happens if you move it anyway?

XO-WORLD-001

The source artwork is approximately 262 dpi at this image width.

Someone else found the same star

XO-WORLD-016 / 146 x 89 mm / Larger candidate with a centered caption.

Complete source scene. Title and question are centered on the image.

No crop, redraw or upscale. Card format remains a choice for review.

50 mm - check after printing

A shared back at the larger size.

146 x 89 mm / Big size / World identity stays hidden when the card is face down.

Supplier size categories include 89 x 146 mm and 127 x 178 mm.

Stock, raised gloss, deck count, box and exact templates still need confirmation.
